

# TAKATA CRISIS: VITAL EMERGENCY IN GUADELOUPE

## Ongoing mobilization in Guadeloupe

As part of the global recall campaign for defective airbags from supplier TAKATA, **GSA would like to remind everyone that 1,336 Volkswagen vehicles in Guadeloupe are still affected and must be repaired in a workshop for safety improvements.**

Since the launch of this campaign, GSA teams have been fully mobilized. They would like to warmly thank the 1,595 customers who replaced their airbags during the first quarter of 2025. This mobilization is essential to prevent potentially fatal accidents related to defective airbags.

## A priority, free and fast Intervention

**The GSA workshop continues to give absolute priority to these airbag replacements. All necessary parts are available,** and the service is completely free for affected owners. The service is also fast, with vehicle downtime lasting less than three hours on average.

## About the Takata recall:

The global recall campaign for defective airbags from the supplier TAKATA affects numerous car manufacturers, including Volkswagen models. TAKATA has supplied the automotive industry with airbags that were defective or contained defective gas generators. If your vehicle is equipped with one, it is possible that over time and under the influence of certain climatic conditions (heat and humidity), your airbags could become dangerous. They then need to be replaced or repaired, as they could increase the risk of serious or even fatal injuries to you and your passengers in the event of an accident. **We urge all affected Volkswagen vehicle owners to contact GSA immediately. This includes vehicles purchased outside the network, imported, or transferred to Guadeloupe as part of a move.** Contacting GSA allows for rapid identification in the context of the recall and ensures the vehicle's safety.
